Admission Letter

Kindly receive my request as per the above subject. I am a Canadian citizen living and pursuing an undergraduate degree in Medicine and Surgery at the Jordan University of Science and Technology. My family will be moving back to settle in Canada in the summer of 2017. For this reason, I would like to relocate with them after completing my third year of study at the Jordan University of Science and Technology. Based on my research, I have found that your institution is among the best in the country that offers the course. In studying medicine, I hope to fulfill my dream of impacting many lives through my practice. I firmly believe that _____ University will give me a firm footing in the field owing to its experience teaching the same course to many excellent practitioners.

I am currently in my second year and my yearly cumulative average (GPA) is 93.10. I attended elementary school in Qatar as from 2003 to 2011, from which I proceeded to join Tariq Bin Zayad Independent Secondary School in the same country. After my graduation from secondary school in 2014, I joined the Jordan University of Science and Technology for a Bachelor of Medicine and Surgery, the school in which I am at the moment. I do hope to make my contributions to the medical field in Canada. The chance to move to the _____ University will enable me to study about the medicine practice in my home country. It will also allow me to learn about the various cultures of the people with whom I shall interact professionally in the future.

I have received many rewards and honors for excellence throughout my time in school¹ and would like to continue with the same as I pursue my studies at your university. I kindly ask

1. Participated in SCORE's Research Day Project (IFMSA)
Participated in Antimicrobial stewardship workshop, July 2016

that you grant me the opportunity to join the _____ University to begin my third year of study in September 2017². I look forward to your response.

BLS for Healthcare Providers Course by American Heart Association (CPR and AED), May 2016

Dean honor list in the 1st year of college, 2014-2015

High School Certificate, June 2014

Excellence Award from secondary school and other lower classes.

2. Medicine school duration in Jordan University is of Science and Technology is 6 years while the same is four years in Canada.
